Muhammad Qadeer

Full Stack / Mern Developer

+923-458537470 | muhammadqadeer37470@gmail.com | https://www.linkedin.com/in/muhammad-qadeer-9866b333b

PROFILE:

Motivated **Full Stack Web Developer** and **Computer Science graduate** with hands-on project experience in building **responsive and user-friendly web applications** using **React.js, JavaScript, HTML, CSS, and Tailwind CSS**. Skilled in **React Hooks, Redux Toolkit, REST API integration, Node.js, Express.js, and MongoDB**. Experienced in developing **full-stack projects** with **frontend and backend functionality, database integration, CRUD operations, and user authentication**. Passionate about **learning modern technologies, solving problems, and contributing to a professional development team**.

PROFESSIONAL EXPERIENCE

Realtime Dashboard

Live: https://real-dashboard-react.vercel.app/ April 2025 - June 2025

- Built a live analytics dashboard in React driven by a simulated data stream, with animated KPI counters and hand-written SVG line, bar and sparkline charts (no chart library).
- Wrote custom hooks for the data stream and number animation, with pause and speed controls.

Full Stack : Job Portal

Live: https://job-portal-phi-liard.vercel.app/ 2026 - Present

- Developed a responsive job portal with candidate and employer authentication.
- Implemented job listings, search and location filters, job posting, and application submission.
- Built REST APIs and MongoDB models for users, jobs, and job applications.
- Implemented password hashing, JWT-based authentication, and role-based access control.

Task Board

Live: https://task-board-five-topaz.vercel.app/ Jun 2026 – March 2026

- Built a kanban board in React with drag-and-drop between columns using the HTML5 Drag and Drop API.
- Persisted tasks in localStorage and added rollback with a clear error message when a save fails.
- Added button controls and ARIA labels so touch and keyboard users can move and delete cards too.

EDUCATION

Computer Science :
University of Management and Technology
